

Airmotiv Speakers

The Airmotiv Passive Loudspeakers were designed from the start to be equally at home in an audiophile stereo system or a high-end home theatre, and combine excellent technical performance, superb sound quality, elegant good looks, and excellent value. The front bezels are finished with multiple coats of attractive satin finish black lacquer, which looks elegant while resisting fingerprints and scratches, and the sides are covered with tough, good-looking textured black vinyl. All Airmotiv speakers include removable, magnetically-attached grilles and several models offer bi-amp/bi-wire terminals.

Subwoofer

- 10" heavy-duty downward firing active low frequency driver
