DESCRIPTION

D3is - Designed for applications where space is a premium. The D3is works equally well mounted in-wall or on-wall. Proprietary isolation mounts and brackets are designed into the enclosure to reduce overall vibration and noise from transmitting to the adjacent wall. The sub was designed using proprietary nonlinear modeling techniques that allow us to simulate and then optimize for real world driver performance - free air and in box. Further refinement is done with the aid of our Klippel laser measurement system to dial things in. Powered by our 1500W amplifier now in its own chasis, utilizing a larger 2.8" LCD touchscreen display. Rack mounting hardware is included. Common to all Perlisten subs, all functions and safeties are controlled by a 48-bit data path DSP and 32-bit ARM M4 Cortex processor, able to react in microseconds ensuring sonic accuracy.
