Primare I15 Prisma

THIS SMALL-FOOTPRINT INTEGRATED amplifier combines DAC and streaming capabilities with a Class D output stage inside a remarkably clean-looking chassis. It puts out a claimed 2x60W into 8ohm and delivers a sound that is more potent than its three-quarter-width dimensions might suggest. In use, its majestic grace, poise and control is matched by a measured and even tonality. Smooth, couth and sophisticated, Primare's I15 Prisma proves that you can have the convenience of app control, stylish elegance and musical satisfaction all in one.
