CONFIDENTIAL/EMBARGOED UNTIL AUGUST 15TH, 2020

OFFICIAL EISA AWARD CITATION FOR:

**EISA HOME THEATRE SUBWOOFER 2020-2021
SVS SB-2000 Pro**

SVS has taken innovations from its larger, pricier models and built them into this new compact subwoofer. Offering a high level of performance at an affordable price, the SB-2000 Pro partners its custom 12in bass driver with a 500W 'Sledge DSP' amplifier, and becomes the entry-point for SVS's app-based parametric EQ and control system. And while the sealed cabinet may be 'small', its performance is anything but – this is a polished performer that unearths both the nuance and scale of movie soundmixes, delivering dramatic, deep bass while simultaneously remaining controlled and speedy.
