REVIEW HCC 233

SVS'S COMPACT SINGLE-DRIVER subwoofer is deceptively straightforward, but the American brand's attention to detail in both the design of the 12in driver and 500W RMS Sledge DSP amplifier results in an electrifying performance that will delight bass-heads. Feed it a movie soundmix and the SB-2000 provides hair-raising levels of low-frequency fun, adding tight, authentic weight to both effects and score. Switch to music and its agility and measured tone come to the fore. The SVS SB-2000 is smartly designed, easy to setup and a treat to listen to.
