

RETAIL Price List - Valid From November 2017

Easy-to-install, 4K-ready screens

The Ultimate Screens range of easy-to-install, acoustically-transparent 4K-ready screens is available in both 16:9 and 2.35:1 aspect ratios. Bespoke screens are also available on short lead times.

Easy Installation

In addition to excellent 4K-ready performance, Ultimate Screens offers installers a new and easy four-stage installation process. Many other brands require the screen to be attached to frame and tensioned face down on the ground, risking damage to the velvet frame and screen material. The innovative Ultimate Screens design allows this process to be completed in simple stages after the frame is attached on the wall:

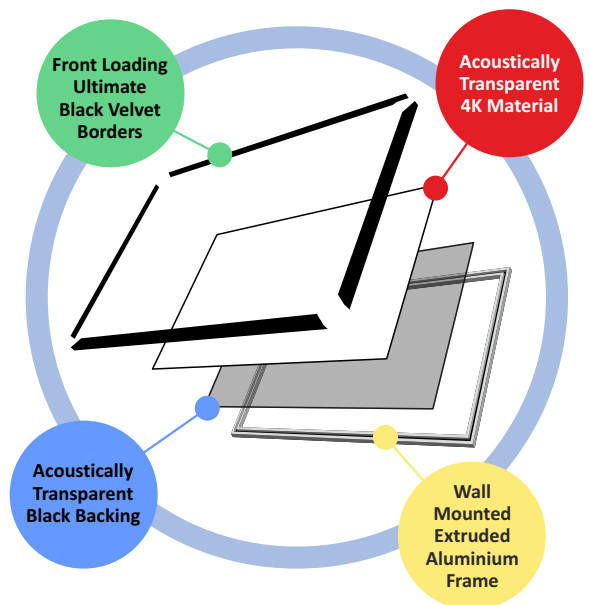

Stage 1: assemble the frame then hang on the wall using the mount brackets

Stage 2: insert the black fabric backing into the screen frame's fabric retaining channel using the supplied fabric tool

Stage 3: add the 4K Acoustically Transparent screen fabric into the fabric retaining track

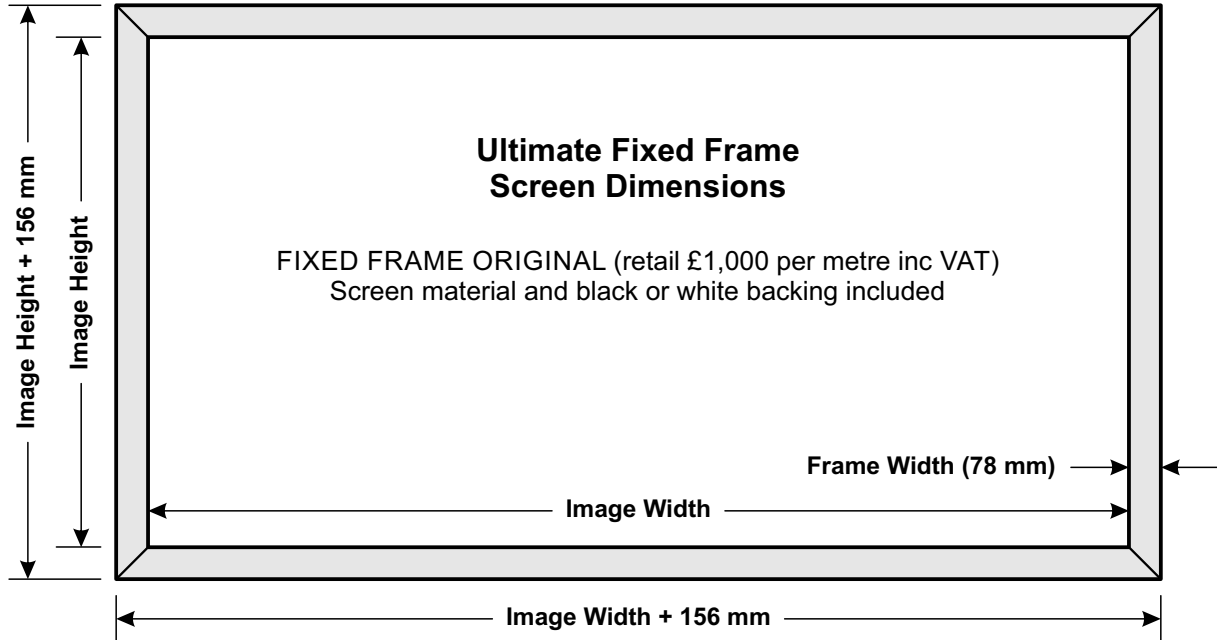

Stage 4: add the front velvet screen borders

Screen features include advanced 4K acoustically-transparent screen material and a tactile ultra-black surround, with class-leading light absorption for exceptional contrast with the projected image.
