Tube Power Amplifiers	RETAIL ex VAT	RETAIL inc VAT
<h3>REX 3 Amplifier</h3> <p>The all-triode REX 3 power amplifier represents a technological tour de force of modern engineering applied to vacuum-tube power-amplifier design. From the plug-and-play simplicity provided by its auto-biasing and electronic protection circuits, to the palpable illusion of recreating the original musical event in your home, the REX 3 combines high-power output, beautiful midrange texture, and great extension at the frequency extremes.</p> <p>Reference 160W Mono tube Reference 80 WPC Stereo zero global feedback, fully symmetrical circuit</p> <p>W x H x D mm: 431 x 228 x 609, 46kg</p>		
REX 3 All Aluminium Tube Mono Power Amplifier - Monoblock pair	£33,333.33	£40,000.00
REX 3 All Aluminium Tube Power Amplifier - Stereo each	£16,666.67	£20,000.00

<h3>VK-90t Amplifier</h3> <p>The VK-90t power amplifier features a fuse-less protection circuit, active current sources for its two gain stages, intelligent auto-bias circuit with LED indicators, and high-current, all-triode, zero-feedback, fully balanced topology. It's complemented by new, silver-gold oil capacitors and ultra-transparent internal wiring in the signal path. With VK-90t, BAT realizes that serious listeners want unique technology, user friendly experiences, and faithful-to-the-source sonics in high-end equipment. VK-90t has no tubes to bias; no fuses to replace; no pentodes imitating triodes; and no direct current at the tube output stage.</p> <p>150W Mono Tube 75WPC Stereo Symmetrical single-ended bridge design</p> <p>All triode signal path from input to output</p> <p>W x H x D mm: 431 x 228 x 609, 40kg</p>		
VK-90t Tube Stereo/Mono Power Amplifier - Monoblock pair	£24,991.66	£29,990.00
VK-90t Tube Stereo/Mono Power Amplifier - Stereo each	£12,495.83	£14,995.00

REX 500 Power Amplifier

Flagship solid-state power amplifier. True dual-mono design with independent channel assemblies, power transformers, and separate power cables for the left and right channels. The gain stages of REX 500 feature the highest current delivery ever achieved in a Balanced Audio Technology design. REX 500 also employs a new power supply topology and a fuse-less protection circuit.

Output per channel at 8Ω/4Ω: 500W / 1000W

W x H x D mm: 483 x 254 x 600, 63kg

REX 500 All Aluminium Solid State Power Amplifier - Monoblock pair

£37,500.00

£45,000.00

£22,500.00

VK-655SE+ Power Amplifier

The fully balanced VK-655SE power amplifier is the ultimate expression of BAT amplifier engineering. A true dual-mono component featuring independent channel assemblies, power transformers, and separate power cords for the left and right channels, the purist approach-based VK-655SE yields maximum soundstage width and depth.

400W Mono | 300 WPC Stereo | N-Channel MOSFET Amp with Gen3 Super-Pak power supply W x H x D mm: 482 x 241 x 597, 54.4kg

VK655SE+ Solid State Stereo/Mono Power Amplifier - Monoblock pair

VK-255SE+ Power Amplifier

The VK-255SE power amplifier represents Balanced Audio Technology's hallmark out-of-the box approach to audio circuit design. Unlike most solid-state amplifiers that feature four or more gain stages in a high-feedback push-pull configuration, the VK-255SE features only two gain blocks in a high-power, zero feedback, and purely symmetrical design.

200W Mono | 150 WPC Stereo | N-Channel MOSFET Amp with Gen3 Super-Pak power supply W x H x D mm: 482 x 165 x 406, 34kg

VK-3500 Hybrid Integrated Amplifier

VK-3500 provides a robust 150 watts per channel into 8-ohm loads and doubles that output into 4-ohm loads. Combine such ability with BAT's vacuum-tube preamplifier section—based on the same reference 6H30 SuperTube used in the company's flagship REX 3 preamplifier— and you get sublime power matched with richly textured musicality. Open, delicate, and natural.

150WPC | Hybrid integrated amplifier with high current 6H30 Supertube Unistage design and phono stage

W x H x D mm: 482 x 146 x 394, 22.7kg

VK-3500 Hybrid Integrated Amplifier

£9,995.83

£11,995.00

VK-80i Tube Integrated Amplifier

The VK80i tube integrated packages BAT's reference engineering and build quality into its most compact form ever. The balanced design shares many attributes with the top-of-the-range REX 3, featuring the same 6C33 high current triode output tube and a stunning all-aluminium chassis. With 55 watts per channel of full triode high-current power, the VK80i will drive nearly any speaker with authority and ease.

55 WPC | Integrated Stereo Amplifier with 6C33C fuse-less protection circuit and autobiasing

W x H x D mm: 431 x 203 x 406, 20.4kg

REX 3 Tube Preamplifier

The culmination of nearly two decades of design, the fully balanced REX 3 preamplifier represents the pinnacle of BAT's purist approach to building a statement control center without peer. Featuring a vacuum-tube power module and separate control module, this groundbreaking two-box component features a transformer-coupled output stage (aka T-REX). The latter replaces BAT's Six-Pak of output capacitors with custom-designed amorphous core output transformers. Sonically, they offer greater dynamics, transparency, top-to-bottom extension, and a more organic portrayal of music.

Reference Dual Chassis 8x 6H30 SuperTube Preamp, separate power and control modules. Amorphous Core transformer coupled output stage

W x H x D mm: 482 x 146 x 394, 35.3kg

£30,000.00

VK-90 Tube Preamplifier

VK-90 uses eight 6H30 SuperTubes to form an extraordinarily high-current, lowimpedance drive engine. VK-90's signal is effectively transmitted through only one gain stage. The Unistage™ circuit provides the ultimate simplicity of amplifying the incoming signal only once, while using no global feedback to double back on the straight-through signal integrity.

W x H x D mm: 482 x 146 x 394, 19kg

VK-90t Tube Preamplifier

£12,495.83

£14,995.00

VK-80 Tube Preamplifier

VK-80 incorporates a second-generation output transformer using the finest Cardas copper winding with its second-generation transformer-coupled outputs. Each of the preamplifier's transformer-coupled outputs comes encapsulated within a mumetal shield, which is substantially superior to any capacitor in maintaining purity of signal transmission. VK-80 also uses the 6H30 SuperTube to form a high current, low-impedance gain stage.

W x H x D mm: 482 x 146 x 394, 18.1kg

VK-P90 Phonostage with Gen 3 SPK

VK-P90 was devised to anchor the world's most revered playback systems. In addition to its transformer-coupled output stage, the all-tube design incorporates four high-gain 6C45 tubes. They provide high-current and low-output impedance, as well as superb drive and crystalline transparency. These design elements result in an ultra-quiet phono preamplifier that's on intimate terms with dynamic ease, grand scale, and musical honesty.

1x RCA + 1x XLR input, 1x XLR output, Selectable loading from 100 to 47k

W x H x D mm: 482 x 146 x 394, 17kg

VK-P90 Phonostage

£10,829.17

£12,995.00

VK-P80 Phonostage

VK-P80 employs a differential RIAA network, permitting ease of adjustment and improved common-mode noise rejection. The completely passive circuit has fewer components than a more traditional implementation, resulting in improved matching of the RIAA curve to specification. With the BAT Flying RIAA network, you can rest assured all your records will sound the way that the engineer intended.

1x RCA input, 1x XLR output, Selectable loading from 100 to 47k

W x H x D mm: 482 x 146 x 394, 16.3kg

REX 3 DAC

REX DAC demonstrates how lifelike and involving digital playback can be when done to the nines. This reference-setting instrument's audiophile credentials arise from state-of-the-art engineering in both the digital and analogue domains. The digital design, from Andreas Koch, runs at an extraordinarily high clock rate to allow for the gentlest and least-intrusive filter at its output. The analogue design, from Victor Khomenko, is a high-current vacuum-tube output stage that alone would exceed the performance of most reference tube preamplifiers. The marriage of these designs conveys the most natural, analogue-like rendition of digital recordings.

High current vacuum-tube output 11.2 MHz DSD DAC with amorphous core transformer coupled output stage
