

ARCHITECTURAL RETAIL Price List - Valid From June 2023

Every GoldenEar architectural loudspeaker, whether it's the versatile Invisa HTR 8000 in-ceiling speaker or the practically invisible SPS in-wall speaker, is meticulously created to blend perfectly with its environment. State-of-the-art drivers and advanced crossover networks are designed from the ground up to create award-winning loudspeakers that virtually disappear in-room, but which have a 'golden voice' that music and movie lovers will adore.
